

II. AMENDMENTS TO THE SPECIFICATION

A substitute specification is included with this response and is attached following the Conclusion section. No new matter is introduced with the substitute specification. The substitute specification includes the corrections to the table labeling that was objected to by the Examiner. Both a marked-up version and a clean version of the substitute specification are attached. The drawings remain as originally filed and are not included with the substitute specification. Similarly, the original claims are not included with the substitute specification and the claims as amended above are the present claims in the application.
